Subject: Lostine Corridor Safety Project

Kris

I just wanted to share with you and your department my thoughts about the meeting we had this afternoon. As a land owner of property 2 miles from the end of the Lostine Canyon road I am thrilled with the Lostine Corridor Public Safety Project being preposed. I have been to several of the meetings about this project and the more I learn the more excited I am to see this project begin. My hope is to pass our family property, which we have had for 75 years, to future generations. The threat of fire his very real and this project will reduce the threat.

We are working to make our property fire safe and forest health and therefore truly appreciate the Forest Service working on the lands surrounding us. This project is long over due and again I am so pleased it is underway.

Please let me know if there is anything I can do to help this project along.
